our products

Large Product Range with Continuous Improvement & Innovations enables us to Excel & Cater A Wide Spectrum of Industry.

- Starch Paste Kettle
- Rapid Mixer Granulator
- Fluid Bed Dryer
- FBD bowl Tipper
- IPC Lifter / Mechanical Loader
- IPC Bin
- Ointment / Cream Manufacturing Plant
- Planetary Mixer
- Liquid / Oral Manufacturing Plant
- Contra Rotary
- Mixer Semi Contra
- Mixer Nauta
- Centrifuge Machine
- Rotocone Vacuum Dryer
- Vacuum Tray Dryer
- Hot Air Tray Dryer
- Octagonal Blender
- Double Cone Blender
- Ribbon Blender
- Cage Blender
- V Blender
- Reactor / Process / Mixing Vessels
- Heat Exchanger
- Storage Tanks / Vessels
- Solvent Storage Tank
- DM Water Tank
- S.S. Piping with Orbital Welding
- S.S. Furniture
- Vacuum (Powder) Transfer System
- Coating Pan

and Many More

Starch Paste Kettle

Available in batch capacities rating from 50 kgs to 1000 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Serves an Effective Purpose in Heating of Paste, Pulp, Juice of Fruits & Vegetables to the desired Temperature.
- Hemispherical design for proper mixing of paste.
- Discharge from bottom via butterfly valve.
- Driven via Motor & Gear box assembly mounted on top.
- Anchor type impeller design for proper mixing of past.
- Hydraulic lifting with tilting arrangement.

Rapid Mixer Granulator

Available in batch capacities rating from 50 kgs to 1000 kgs & R & D model also Available, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Mix the dry Components first, followed by wet granulation without transferring the dry mixture
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.
- High Quality Precision Machine suitable for fast efficient & uniform mixing

Fluid Bed Dryer

Available in batch capacities rating from 3 kgs to 500 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- cGMP construction with option 3 stage filtrations.
- Steam or Electric Heating System.
- Modern PLC base control system with manual operation
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.

Multi Mill

Available in batch capacities rating from 50 kgs to 1000 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Serves an Effective Purpose in Heating of Paste, Pulp, Juice of Fruits & Vegetables to the desired Temperature.
- Hemispherical design for proper mixing of paste.
- Discharge from bottom via butterfly valve.
- Driven via Motor & Gear box assembly mounted on top.
- Anchor type impeller design for proper mixing of past.
- Hydraulic lifting with tilting arrangement.

Vibro Sifter

Available in batch capacities rating from 50 kgs to 1000 kgs & R & D model also Available, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Mix the dry Components first, followed by wet granulation without transferring the dry mixture
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.
- High Quality Precision Machine suitable for fast efficient & uniform mixing

FBD Bowl Tipper

Available in batch capacities rating from 3 kgs to 500 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- cGMP construction with option 3 stage filtrations.
- Steam or Electric Heating System.
- Modern PLC base control system with manual operation
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.

IPC Bin

Available in batch capacities rating from 50 kgs to 1000 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Serves an Effective Purpose in Heating of Paste, Pulp, Juice of Fruits & Vegetables to the desired Temperature.
- Hemispherical design for proper mixing of paste.
- Discharge from bottom via butterfly valve.
- Driven via Motor & Gear box assembly mounted on top.
- Anchor type impeller design for proper mixing of past.
- Hydraulic lifting with tilting arrangement.

Coating Pan

Available in batch capacities rating from 50 kgs to 1000 kgs & R & D model also Available, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Mix the dry Components first, followed by wet granulation without transferring the dry mixture
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.
- High Quality Precision Machine suitable for fast efficient & uniform mixing

Planetary Mixer

Available in batch capacities rating from 3 kgs to 500 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- cGMP construction with option 3 stage filtrations.
- Steam or Electric Heating System.
- Modern PLC base control system with manual operation
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.

Ointment/Cream Mfg. Plant

Available in batch capacities rating from 50 kgs to 1000 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Serves an Effective Purpose in Heating of Paste, Pulp, Juice of Fruits & Vegetables to the desired Temperature.
- Hemispherical design for proper mixing of paste.
- Discharge from bottom via butterfly valve.
- Driven via Motor & Gear box assembly mounted on top.
- Anchor type impeller design for proper mixing of past.
- Hydraulic lifting with tilting arrangement.

Contra Rotary Mixer

Available in batch capacities rating from 50 kgs to 1000 kgs & R & D model also Available, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Mix the dry Components first, followed by wet granulation without transferring the dry mixture
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.
- High Quality Precision Machine suitable for fast efficient & uniform mixing

Liquid / Oral Mfg. Plant

Available in batch capacities rating from 3 kgs to 500 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- cGMP construction with option 3 stage filtrations.
- Steam or Electric Heating System.
- Modern PLC base control system with manual operation
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.

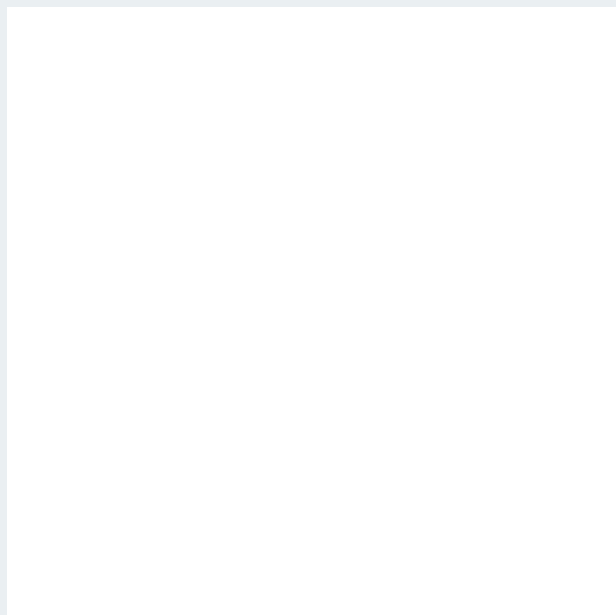

Reactor

Available in batch capacities rating from 50 kgs to 1000 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Serves an Effective Purpose in Heating of Paste, Pulp, Juice of Fruits & Vegetables to the desired Temperature.
- Hemispherical design for proper mixing of paste.
- Discharge from bottom via butterfly valve.
- Driven via Motor & Gear box assembly mounted on top.
- Anchor type impeller design for proper mixing of past.
- Hydraulic lifting with tilting arrangement.

Limpet Jacketed Reactor

Available in batch capacities rating from 50 kgs to 1000 kgs & R & D model also Available, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- Mix the dry Components first, followed by wet granulation without transferring the dry mixture
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.
- High Quality Precision Machine suitable for fast efficient & uniform mixing

Jacketed Reactor

Available in batch capacities rating from 3 kgs to 500 kgs, as per client requirement.

FEATURES :

- Available in Standard cGMP and Customized models with SS304/SS316/SS316L Contact Part.
- cGMP construction with option 3 stage filtrations.
- Steam or Electric Heating System.
- Modern PLC base control system with manual operation
- Unique pneumatic swivel lid arrangement for increased operator safety & ease of set-up.
- Easy Clean & Maintenance, Wear & Corrosive Resistance.
- Easily dismantled chopper for cleaning validation.
